

NEWS RELEASE

Cable Highspeed Internet is officially launched and available from WTC; making WTC Communications the 1st alternative provider of Cable Internet Access in the Greater Kingston Area.

KINGSTON, ONTARIO, October 7th, 2005 - Again, communication just became easier. Now in the Greater Kingston Area, WTC Communications can be the consumer's choice for cable highspeed internet access. From "ultra-fast internet access to wireless and dedicated access to VoIP (Voice over Internet Protocol) phone systems, WTC Communications offers true convergence and choice; Now it is about the consumers choice, not just more choice.

Consumers can benefit by partnering with WTC Communications for cable internet access:

- Packages are competitive and start from \$29.95
- SPOC (Single Point of Contact) for ease of use
- Working with an established company helps provides peace of mind
- One Stop shopping provides savings, competitiveness, quality of service, support, & ease of purchase

"WTC Communications wants to offer their customers the full spectrum when it comes to internet access. With DSL, cable, wireless, dialup, and dedicated access, consumers have a choice of service without having to change providers. Another 1st for the Greater Kingston Area and WTC Communications "says Tom Lynn, President, WTC Communications.
